Microsoft Defender ATP connection

Connect to Windows ATP Off

Use this feature to investigate threats between Office 365 and windows devices. When you turn this on:

- You will be able to view device details and Microsoft Defender ATP alerts from the Threat Explorer.
- Microsoft Defender ATP will be able to query Office 365 for email data in your organization and show links back to filtered views in the Threat Explorer.

Note: To turn on this connection, your organization must have a Microsoft Defender ATP subscription and security analysts must have access to Office 365 Threat intelligence and Microsoft Defender ATP.
