

New - Content Search

Content search is a tool in Microsoft 365 compliance center that is used to find emails in exchange online mail boxes.

Content search can be also used to search documents in sharepoint online and onedrive as well as messages in Microsoft Teams

Both Content Search and eDiscovery are used to search and download results in pst files

With eDiscovery you are given the option to search and place the contents on hold while with Content Search you do not have this option.

For permissions to run content search or eDiscovery you must be a member of eDiscovery role group
