

Disabling user account control

1. In Server Manager on the task bar Right-click on the start icon and select **control panel**
2. Click on User Accounts
3. Click on User Accounts again
4. Click on change user account control settings
5. Drag the bar down to the last setting to turn off user account control
6. Select OK and close the user account box

Turn off the Group policy setting for user account control for Administrators

7. Click on Tools, Local Security Policy, Local Policies
8. Select Security Options
9. Select User Account Control: Run All Administrators in Admin Approval mode
10. Select Disabled
11. Click on Apply, click on OK

Update the Policy

1. Click on the command prompt icon on the task bar
2. Type gpupdate, press Enter
3. Close the command prompt box

Check to see if the policy is turned off

1. Right click on the start icon and click on Control Panel
 2. Click on Action Center, Click on Security
 3. Notice the user account setting "UAC will never notify you when Apps try to make changes to the computer"
 4. Click on change settings to view the settings
